

## Objekti na gomili

Unary_Function
vtable*
int lower_bound
int upper_bound

Square
vtable*
int lower_bound
int upper_bound

Linear
vtable*
int lower_bound
int upper_bound
double a
double b

## Virtualna tablica

Unary_Function
double value_at(double)
double negative_value_at(double)

Square
double value_at(double)
double negative_value_at(double)

Square
double value_at(double)
double negative_value_at(double)

## Strojni kod funkcija

Unary_Function
Unary_Function(int, int)
double negative_value_at(double)
void tabulate()
static bool same_functions_for_ints (Unary_Function*, Unary_Function*, double)

Square
Square(int, int)
double value_at(double)

Linear
Linear(int, int, double, double)
double value_at(double)
